

Energy Efficiency at Work

The Southern African Association for Energy Efficiency (SAEE), Chapter of the Association of Energy Engineers (AEE), has this year once again presented a successful Southern African Energy Efficiency Convention (SAEEC) at Emperors Palace during October 2007.

The event, attended by over 250 delegates, was opened by Honourable Minister Buyelwa Patience Sonjica, Minister of the Department of Minerals and Energy, followed by over 40 papers presented by local and international experts in the field addressing relevant issues on energy efficiency ranging from demand side management projects, measurement and verification, energy management, industrial case studies, industrial energy efficiency and co-generation, CDM and renewable energy. Co-located with the Convention was the exhibition area with the latest products, technologies and services on display by almost 40 exhibitors.

This event was made possible by the generous sponsorship of platinum sponsor, Philips; gold sponsors, Energy Cybernetics and BASF-the chemical company; gold

sponsor to the banquet, Saint-Gobain; and silver sponsor, BluESP – other sponsor companies included GSD Potch, ABB, National Power and Iskhus. The lucky-draw was sponsored by Solarcon who donated a solar cellphone charger.

The SAEEC 2007 was accredited by the SAIMEchE for CPD credits with ECSA.
