### African Utility Week

22 – 25 February 2010

Durban,  
South Africa

African Utility Week will bring real insight into optimising the revenue potential of your utility through smart metering and revenue protection; the realities of running your utility as a commercial enterprise and strategies to get the most out of your existing infrastructure. The role of renewable energy is examined as part of a comprehensive energy mix and rural electrification and access to water will be debated by industry visionaries.
