

The HellermannTyton

Mindbender?

Trick shot

One of Fred Finger's favourite trick shots is to hit a snooker ball so that it travels right round the table, hitting all four cushions and coming back to its exact starting point.

In which direction does he hit the ball, and how far does it travel on its journey?

Solution to March 2008 mindbender

Long distance travel

Harry Hoppit was setting out for roughly the opposite point on the globe to London, so it made no difference in which direction he set out – he would have to travel half-way round the earth to get there. In fact, the point exactly opposite London on the earth is in the sea, so it is reasonable to suppose that he was flying to somewhere in South Island, New Zealand.

Winner

Jorge Ramos from Air Liquide in Alrode.

Competition rules:

Answers must be written in block capitals on the coupon provided and entries must be posted, faxed or e-mailed to arrive no later than **9 June 2008**.

The first correct entry drawn will receive the Toptronic Digital Clamp Meter TBM3030 AC Clamp (600 A) with enhanced features from HellermannTyton. No correspondence will be entered into and the decision of the organisers will be final.

No staff members of Crown Publications or their families may enter.
